INTRODUCTION

The present catalogue gives data for 7127 stars in the northern hemisphere which appear to possess proper motions larger than $0''.2$ annually. As such it constitutes the companion volume to the similar catalogue for the southern hemisphere published in 1957. As before, the motions have been checked on the plates of the Bruce Proper Motion Survey wherever possible but this survey covers only about 30 percent of the northern hemisphere.

All data available to us before 1 January 1961 have been included. For 38 stars for which the information did not become available until after the pages on which they occur had been typed, these data are given in an appendix as are also those for a further 142 stars whose motions are indicated by Greenwich to be larger than $0''.2$ but for which no positions were given. These latter stars were not given LTT numbers. A cursory check indicates that 16 percent of the stars are contained in the General Catalogue while 32 percent were found at Minnesota; that those first found by Wolf, Ross, and Giclas and at Greenwich account for 6, 10, 13, and 5 percent, respectively while the remaining 18 percent come from miscellaneous sources such as the Radcliffe and Mount Wilson Selected Area surveys and the lists of Innes, Furuhielm and Hamburg.

Data from the General Catalogue have always been given preference over others; in all other cases weighted means have been taken. In a few instances where the different values were extremely discordant the stars have been included — for the simple reason that it is easier to delete a line than to add one — but the motion is given as $0''.2$: to indicate its uncertainty.

As in the case of the southern catalogue, the present list should not be considered in any way complete or homogeneous either down to a definite magnitude or proper motion limit, and should not even be considered as uniformly incomplete over the sky.

The arrangement of the catalogue is the same as before and the continuous serial numbers (LTT) given in the first column begin with 10001 in order to avoid any possible confusion with stars from the southern hemisphere. The second column gives the BD number wherever possible, otherwise the discovery designation except for the few stars which were not numbered in the original publication (Innes, Hertzsprung) or come from short lists which would introduce too great a variety of nomenclature. All magnitudes given are photographic.

The extension of the Bruce Proper Motion Survey to the northern hemisphere — and from this comes at least a large fraction of the stars listed — was made possible through the generosity of the Harvard Observatory which took, and lent us all the necessary plates (more than 300 pairs) and through the continuous financial aid received from the Graduate School of the University of Minnesota, the Office of Naval Research and the National Science Foundation. For the color observations I am indebted to the Steward Observatory of the University of Arizona which has permitted me the use of the 36-inch reflector for this purpose on many occasions. Publication of the catalogue has been assured through a subvention from UNESCO made through Commission 24 of the International Astronomical Union.

For the painstaking scrutiny of the literature, the compilation of the catalogue itself, and the typing of the manuscript I am indebted to Mrs. J. H. Anderson and Miss Diane Schneider.

Minneapolis, Minnesota

16616 Comp to 16615, separation 10"
16618 Comp to 16617, 188° 41"
16645 Not common with 16644, 201° 122"
16647 ADS 16138, 7.0-7.0 vis, 0:2, rapid
16653 RZ Cep
16660 ADS 16173, 5.5-5.5 vis, 60° 0:4
16685 ADS 16248, possibly optical
16689 Comp to 16688, separation 2"
16694 With 16693, ADS 16261, 107° 12"
16710 Comp to 16709, 111° 53"
16722 Comp to 16721, 20° 248"
16723 ADS 16326, 8.0-8.8 vis, 0:4, rapid
16741 ADS 16379, 8.6-10.4 vis, 224° 4:7
16752 ADS 16417, 7.0-7.5 vis, 154° 0:3
16769 ADS 16483, optical
16798 Comp to 16797, separation 23"
16809 With 16808, ADS 16562, 157° 4:0
16849 ADS 16665, 8.9-9.9 vis, orbit
16854 Burnham 12305, optical
16873 With 16872 ADS 16713, 85° 6:0
16909 Comp to 16908, 325° 12"
16914 Comp to 16913, separation 33"
16920 Comp to 16919, 183° 3:5, flare star
16930 ADS 16830, 7-12.8 vis, 210° 14"
16943 Comp to 16942, 110° 8"
16990 Comp to 16991, 9° 174"
17036 Probably common with 17029, 90° 13"
17038 ADS 17062, 6.8-11.7 vis, 76° 5:6
17063 With 17062 ADS 17131, 310° 9"
17072 ADS 17147, 9.3-12.0 vis, 107° 2:5
17097 Comp to 17096, 243° 4:8
13783 Comp to 13782, 22° 39"
17111 Comp to 10623, 118° 2:4
